

English / Espanol - with a tiny example for each term.

ENGLISH	ESPANOL	EXAMPLE / EJEMPLO
function	funcion	One output per input
input / output	entrada / salida	x goes in, y comes out
function notation	notacion de funcion	$f(x)$; $f(3)$ means plug in 3
domain	dominio	All the inputs (x-values)
range	rango	All the outputs (y-values)
ordered pair	par ordenado	(x, y) - x first, y second
coordinate plane	plano de coordenadas	The x-y grid
vertical line test	prueba de la linea vertical	Hits twice = not a function
y-intercept	interseccion con el eje y	Where $x = 0$: point (0, b)
x-intercept	interseccion con el eje x	Where $y = 0$
zero of a function	cero de una funcion	The x that makes $f(x) = 0$
increasing	creciente	y rises as x grows
decreasing	decreciente	y falls as x grows
average rate of change	tasa de cambio promedio	(change in y)/(change in x)
mapping	correspondencia	Arrows from inputs to outputs
