

English / Espanol - with a tiny example for each term.

ENGLISH	ESPANOL	EXAMPLE / EJEMPLO
system of equations	sistema de ecuaciones	Two equations, one shared answer
solution of a system	solucion de un sistema	The (x, y) that works in BOTH
intersection	interseccion	Where the graphs cross
substitution	sustitucion	Plug one equation into the other
elimination	eliminacion	Add equations so a variable cancel
isolate	aislar	Get one variable alone first
no solution	sin solucion	Parallel lines - never cross
infinitely many	infinitas soluciones	Same line twice
parallel lines	lineas paralelas	Same slope, different intercepts
break-even point	punto de equilibrio	Where two plans cost the same
count equation	ecuacion de cantidad	$a + c = 10$ (how many)
value equation	ecuacion de valor	$8a + 5c = 65$ (how much)
system of inequalities	sistema de desigualdades	Two shaded regions
overlap / solution region S	region solucion S	Where BOTH shadings agree
test point	punto de prueba	Plug in to check the region
